

SECOND NOTICE ICG CEPA Update Conference 2010

Conference: Wednesday/Thursday, 12 – 13 May 2010
Pre-conference workshops: Tuesday, 11 May 2010
Sheraton Toronto Airport Hotel, 801 Dixon Road, Etobicoke
(near the Toronto Pearson Airport)

Coming in May, the ICG will present its new “CEPA Update Conference” covering current developments in the regulation and management of new and existing substances under the Canadian Environmental Protection Act (CEPA). *[A preliminary agenda with invited speakers is included, but is subject to change.]*

Industry experts, along with representatives from Environment Canada and Health Canada, will deliver the presentations and be available to discuss your areas of interest. . An exhibition area will also be available to showcase products and services that are available to help you understand and comply with CEPA-related regulatory requirements

This will be an excellent chance to refresh your knowledge and get some new insights on the New Substances Notification Regulations (NSNR) and hear the latest on Nanomaterials.

With Canada's Chemicals Management Plan (CMP) in full swing, the conference will provide detailed coverage of developments in the assessment and management of existing substances. There will be case studies using some recent experiences that we can learn from and discuss.

Learn how these efforts relate to the European REACH Program, the Montebello Accord, and the revision of TSCA.

NEW: This year you can submit a question that you would like addressed by the presenters. See the form that follows the registration form in this package. We want to be responsive to your needs!

Highlights:

- Presentations on the NSN Regulations, and lessons learned from their first few years in effect, will help a company ensure compliance and maximize potential benefits.
- The “Quick Start” survey and how to prepare for the next step in the creation of an “IUR”-like mechanism?
- Updates on industry's and government's experiences with the Chemicals Management Plan and Industry Challenge. Case studies will clarify the overall process.
- Risk Assessment under CEPA – providing input to the Screening Risk Assessments and commenting on drafts.
- Risk management under CEPA – what can companies expect for substances declared “CEPA toxic” and how to get involved in the follow up?
- What do you need to know about SNAC's on new and existing substances?
- What role will CMP assessments play under the Montebello Accord and in other international jurisdictions?
- What is the outlook for the In Commerce List and the environmental assessment of substances regulated under the Food & Drugs Act?
- Valuable pre-conference training workshops on new substances and existing substances.

The time to register is now! You won't want to miss this valuable event! (Don't forget to submit your question(s)! Further information about the current agendas, registration and hotel arrangements are included.

Note: The hotel is the same venue we used last time – only the name has changed. A **special rate for a block of hotel rooms is available, but don't delay. Last time some missed out!**

(near the Toronto Pearson Airport)**

Tuesday, May 11th, 2010

Schedule:

Workshop Registration (incl. continental breakfast): 7:30 – 8:30 am

A.M. Session: 8.30 – noon

Lunch (on your own): 12:00 – 1:00 pm

P.M. Session: 1.00 – 4.30 p.m.

The workshops on New Substances and the Chemicals Management Plan will run concurrently and be repeated in both morning and afternoon session timeslots.

Workshop Topics:

Workshop A: Training in the Fundamentals – New Substances (NSNR)

Workshop B: Training in the Fundamentals – Chemicals Management Plan (CMP)

Workshop A: NSNR Fundamentals

The New Substances Notifications Group from Environment Canada will be leading this session, along with assistance from the ICG. It will provide anyone with limited knowledge of the New Substances Notification Regulations (NSNR), as they apply to Chemicals & Polymers, with the basic grounding needed to embark on the preparation of New Substance Notifications (NSNs). Some practical exercises will be included to help clarify the subject-matter. This session will serve as a good orientation to ensure maximum value is gained from the following days of the conference.
